

Battery Management System

The bridge between the inverter & lithium battery

Features

- It allows the inverter to communicate with the lithium battery.
- Auto coordinate our inverter to follow the BMS of the lithium battery.
- BMS Box is available for SP Brilliant (Ultra & Plus) / SP Handy (Plus) / SP Initial-P & M
- BMS Card is available for SP Premium

Package Included

BMS Card / Box

Communication cable

What's BMS?

BMS (Battery Management System) is a system for rechargeable battery management.

It monitors the status of battery, including battery voltage, current, and temperature. BMS could protect its battery from overcharging and over-discharging based on these information. With the help of BMS, the longevity of a battery life.
